

Nordic Climate Forum for Construction 2022

Webinar 8. September 2022 12-15

Join us for a discussion about the Nordic approach on reducing the building sector's climate impact, and external factors that help to shape it.

Learn about the policy development of the regulations of CO₂-reduction in buildings worldwide, in the EU and especially in the Nordic countries, how to practically use BIM to report CO₂-emissions from materials and listen to the presentations of the two Nordic programmes Nordic Sustainable Construction and Nordic Networks for Circular Construction.

The Nordic ministers decided in 2018 that harmonization of building regulation should be strengthened. This led to the first Nordic Climate forum for Construction in 2019, which became the starting point of an effort towards Nordic harmonization for low carbon emissions from construction.

The climate forum is a yearly event for discussions with policymakers and stakeholders from industry, academia, and the finance sector.

The event will be held in English.

Event details

Date: 8. September 2022
Time: 12-15 (CEST Time Zone)
Place: Online, webinar
Registration: <https://www.anpdm.com/public/event/RegistrationForm/4342594A7243455E447740>
Registration deadline: 5. September 2022

Program - webinar 8. September 2022

- 12:00 **Welcome**, Norwegian Building Authority
- 12:05 **Policy development of the regulations of CO₂-reduction in buildings**
- **Worldwide policy development**, Panu Pasanen, CEO, OneClickLCA, Finland
 - **The draft proposal for the EPBD with a focus on LCA**, Brigitte Jacquemont, Policy Officer in DG Energy
 - **The Whole Life Carbon Roadmap**, Josefina Lindblom, Policy Officer in DG Environment
 - **Presentation of proposal for the CPR, with focus on LCA, and other initiatives of DG GROW**, Philippe Moseley, Policy Officer in DG GROW
-
- 12:55 **Coffee break**
-
- 13:05 **Development of limit values for CO₂-emissions in buildings in the Nordic countries**
- **An overview of today's regulation for all the Nordic countries**, Morten Buus, Buus Consult, Denmark
 - **Finland**, Matti Kuittinen, Ministry of the Environment, Finland
 - **Denmark**, Luzie Rück, Danish Housing and Planning Authority, Denmark
 - **Sweden**, Kristina Einarsson, Boverket, Sweden
-
- 13:50 **Coffee break**
-
- 14:00 **Climate Declaration and BIM – how to practical report CO₂-emissions for buildings**
- **Presentation of the new standard** "ISO 22057 Data templates for the use of environmental product declarations (EPDs) for construction products in building information modelling (BIM)", Anne Rønning, Norsus AS, Norway
 - **How to use BIM to report CO₂-emissions from building materials**, Lars Myhre, Boligprodusentene, Norway
- 14:40 **Presentation of the Nordic programmes:**
- **Nordic Sustainable Construction** (<https://nordicsustainableconstruction.com/>), Helle Redder Momsen, Danish Housing and Planning Authority, Denmark
 - **Nordic Networks for Circular Construction** (<https://nordiccircularconstruction.com/>), Matti Kuittinen, Ministry of the Environment, Finland
- 15:00 **End of program**

We look forward to seeing you online!
